## Welcome to Bran-Art, Inc.

You are receiving this exclusive newsletter from Bran-Art because you are one of our valued customers. We would like to make you aware of some new products and information being offered by Bran-Art, Inc. In September of 2007, Bran-Art, Inc. launched it's website at [www.bran-art.com](http://www.bran-art.com). We are very excited about our new site as a method of getting information to our customers. We encourage you to visit our site regularly and we welcome your feedback. In addition to our new website, we also opened our new Western NY office, just outside of Buffalo, NY. You can reach Arthur in that office at (716) 200-4598 or by email at [Arthur@bran-art.com](mailto:Arthur@bran-art.com).

## LumiNite

Bran-Art, Inc. is now offering a new and unique form of emergency lighting, its called Luminite and it works great! Luminite is a revolutionary new product designed specifically for the needs of today's emergency services. Durable, easy to use and extremely quiet, this inflatable light tower provides first responders and mobile units with an impressive amount of ambient lighting in 3 minutes. This light is easy on the eyes and luminite towers can be placed where lighting trucks cannot go. More information is available at [www.bran-art.com/Luminite1.html](http://www.bran-art.com/Luminite1.html).

## Bran-Art Instantaneous Water Heaters

The Bran-Art Instantaneous gas water heater is 80-83% efficient. On demand tankless gas water heaters provide a continuous supply of hot water; only heating the water needed, cutting water heating costs up to 50%. The compact design of this water heater delivers 5.8 GPM at a 54degree F rise.

**Water heater:** may be used in outdoor environmental conditions, is compact, and easily wheeled to location needed.

**Main control:** Sets exact water temperature in degrees.

**Built in signal:** notifies the microprocessor to start the burner operation when nozzle is open and stop when water nozzle is closed.

**Gas:** is only consumed when water is heating.

**Energy efficient:** electronic ignition system grants significant energy savings

**Advanced control:** system uses a sensor to maintain a constant outgoing water temperature.

**Service codes:** are displayed on the main control specifying diagnostics codes.

**Endless loop:** in input and output control ensures a stable flow of hot water.

**Rich, lean design:** of the burner produces minimum nitrous oxides.

**Potted control:** circuit board provides greater reliability of electric components.

**Fittings:** 3/4 inch Quick connect single input and dual outputs

The new Bran-Art Diesel powered Water Heater combines instant, continuous on-site water heating capabilities with compact size and light weight. Mounted in a powder coated, steel cage with large wheels and wheelbarrow style handles, this unit is easily transported anywhere on the emergency scene. The heater has an adjustable thermostat so water temperature can be adjusted during use. The heater provides hot water instantaneously, however it contains about 5 gallons of water in its system resulting in minimal temperature fluctuation. The unit has an approximate dry weight of 110 Lbs. making it the lightest diesel powered water heater on the market today. The removable fuel tank is mounted on the frame and has carrying handles which allows for remote refueling.

## Zumro Shelter Insulation Package

The new redesigned ZUMRO Shelter Insulation Kit is now available for all Zumro Shelter Models. The insulation system design was changed recently to accommodate the many requests of our customers for "in-the-field" upgrades for their shelters. The new insulation package features:

- Ability to be used in any ZUMRO Shelter Can be used and/or installed in existing Shelters
- Does not restrict use of any interior design features such as curtains
- Leaves structure exposed to hang lighting and other accessories
- Thin and lightweight, easy to store and easy to install
- High "R" value of 10.3

The new insulation kit works extremely well. Tests showed a dramatic drop of over 20 degrees F. when used with a proportionally sized AC Unit in 90-degree sun.

## Bran-Art Emergency Response Carts

Coming soon to Bran-Art, Inc are our newly designed emergency grade steel cart systems. These carts will have several different options such as a deployment door for Zumro Air Shelters, custom made cart covers and extra shelves. Specialty carts such as a generate and supply power cart or a cart specifically designed for water handling will also be available. Please visit us on the web at [www.bran-art.com](http://www.bran-art.com) for update on our Emergency Response Carts.

## Bran-Art Blade Box

The all new Bran-Art, Inc. Blade box is specifically designed for emergency fire personnel. These units safely hold, store and transport up to 8 cut-off saw blades. These boxes are brightly colored so they can be found quickly. The unit is easy to use allowing for quick removal of blades as needed. These units are of high quality yet they will be more affordable than competitors products. Please keep a look out for a special promotional offer on these units including a free Blade Box with the purchase of 8 carbide tipped blades. Please contact us for more information on this product.

## TEMPS Beds

The TEMPS Bed (Triage & Emergency Management Preparedness System Bed) system is an easy-to-assemble, knock-down patient bed (patient gurney) that provides a unique solution to your organization's need for additional bed capacity resulting from a mass casualty incident or routine emergency department overflow. Extend your organization's surge bed capacity with this unique emergency bed system.

Join other organizations (hospitals, EMS, emergency departments, first responders, etc.) who have the PVC TEMPS Bed systems on hand in case of any mass casualty event where your emergency preparedness plan will include a need for temporary or emergency bed capacity. This temporary bed system is unrivaled in its flexibility -- whether your

organization needs surge capacity (overflow capacity), is treating patients injured as a result of acts of nature, weather, accidents or terrorism OR is treating and possibly performing decontamination on patients injured/contaminated as a result of bioterrorism, pandemic or epidemic.

The TEMPS bed is constructed of the highest quality polyvinyl chloride (PVC) resin structural tubing which will not chip, dent, crack, peel, fade, stain or sustain bacterial growth. The patient support sling is a vinyl coated polyester mesh and is tension adjustable for maximum patient comfort.

The TEMPS bed has been developed in conjunction with leading experts in the field of trauma and emergency medical care and has been field tested in rigorous multiple casualty disaster drills in hospitals in several states.

Thank you for your interest in Bran-Art, Inc. If you have any questions, need additional information, a quote or a free demonstration of our products please do not hesitate to contact us. We appreciate your business and look forward to providing you with exceptional quality products and service you have come to expect from Bran-Art, Inc.
